Project #5028

27 October 1964

MEMORANDUM FOR THE RECORD

SUBJECT: Permanent Splice for Editing Table

Discussed the desirability of making an editing table that would join the film with a permanent splice rather than the tape method as originally conceived in the development objectives dated 11 September 1964. [REDACTED] stated that he did not want his personnel to have the responsibility of making the permanent splice so we agreed to continue with the objectives as written.
